

Presenting Author	Abstract Title	Poster Number
1. Cereal crops, breeding and biotechnology		
Lafiandra, D.	Chemical Mutagenesis: A Power Tool to Modify Wheat Starch Composition	P1/01
Rakszegi, M.	Wheat Breeding for High Amylose Content	P1/02
Nemeth, C.	Decreased (1,3;1,4)-B-D-Glucan In Endosperm of Wheat by RNAI Inhibition of the CSLF6 Gene	P1/03
Wilkinson, M. D.	Manipulation of Arabinoxylan Composition in <i>T. aestivum</i> Var. Cadenza	P1/04
Branlard, G.	Some Possibilities Offered by Achievements in Proteomics Analysis of Wheat Grain Performed in the Framework of the Healthgrain Programme	P1/05
Charmet, G.	Combined Meta-Genomics Analyses Unravel Candidate Genes for the Grain Dietary Fiber Content in Bread Wheat (<i>Triticum aestivum</i> L.)	P1/06
Ravel, C.	Genetics of Folate Content in Bread Wheat	P1/07
Gergely, S.	New Possibilities for Measuring of Bioactive Components in Grains and Products With NIR	P1/08
Lampi, A-M.	Localization of Folate and Plant Sterols in Grain Fractions of Wheat	P1/09
Lampi, A-M.	Variation of Plant Sterols and Tocols in Wheat and Rye Grains	P1/10
Pihlava, J-M.	Flavonoid Content in Barley, Oat, Rye and Wheat Cultivars	P1/11
Gebruers, K.	Effect of Environment and Genotype on the Content of Dietary Fiber and its Components in Wheat in the Healthgrain Diversity Screen	P1/12
Boros, D.	Simplified Methods for Determination of Dietary Fibre and its Components in Cereals	P1/13
Carcea, M.	Bioactive Molecules in Cereals and Their Antioxidant Capacity	P1/14
Edelmann, M.	Folate in Oat and Barley Fractions	P1/15
Menkovska M.	Quality Characteristics of Domestic Triticale Cultivars in Regard to the Nutritional and Technological Importance	P1/16
Abugalieva, A. I.	Oat Genetic Resources in Kazakhstan	P1/17
Barcelo, P.	Tritordeum - a novel cereal species with potential for use in functional food applications	P1/18
2. Technology and processing		
Heine, D.	Microorganism and Mycotoxin Reduction of Naturally Contaminated Grains Using Peeling Technology	P2/01
von Reding, W.	Gut Fermented Products of Wheat Aleurone With Protective Effects on Human Intestinal Tract	P2/02
Brygo, F.	Following Wheat Grain Ablation by Chemometric Analysis of Laser-Induced Breakdown Spectra	P2/03
Barron, C.	Discriminant Analysis Applied to FTIR Spectra as a Tool to Monitor Fractionation of Wheat Grain Tissues	P2/04
Hemery, Y.	Impact of Wheat Bran Dry Fractionation on the <i>In Vitro</i> Bioaccessibility of Phenolic Acids and the Antioxidant Potential of Bran-Rich Breads	P2/05
Hemery, Y.	Potential of Wheat Bran Dry Fractionation for the Production of Food Ingredients	P2/06
Hemery, Y.	Supercritical CO2 Lipids Extraction From Wheat Bran & Aleurone, and Nutritional Potential of the Extracted Oils : Influence of Particles Size & Solvent	P2/07
Hemery, Y.	Influence of Temperature and Moisture Content on the Mechanical Properties and Grinding Behaviour of Wheat Bran	P2/08
Rosa, N.N.	Antioxidant Capacity of Wheat Bran as a Function of its Structuration State.	P2/09
Courtin, C. M.	Thumb Flexibility of Glycoside Hydrolase Family 11 Xylanases	P2/10
Courtin, C. M.	Potential of Extremophilic Xylanases for <i>In Situ</i> Production of Prebiotic Arabinoxylan-Oligosaccharides	P2/11
Courtin, C. M.	<i>In Vitro</i> Fermentability of Arabinoxylan-Oligosaccharides Produced in Wheat Bran in a Dry Ball Milling Process	P2/12
Putseys, J. A.	Amylose-Lipid Complexes as Additives in Starch Based Food Systems	P2/13
Katina, K.	Fermented Wheat Bran as a Functional Ingredient in Wheat Baking	P2/14
Sibakov, J.	Controlled Depolymerization of Oat Beta-Glucan for Beverage Applications	P2/15

Selinheimo, E.	Use of Xylanases and Oxidative Enzymes to Improve Gluten Network Properties in Whole Grain Wheat Bread	P2/16
Santala, O.	Impact of Water Content on the Efficiency of Xylanase Treatment of Wheat Bran	P2/17
Straumite, E.	Flour Blend From Non-Traditional Cereals in Latvia	P2/18
Thomann, R.	Pasta and Extruded Cereals as Vehicle for Traditional and Innovative Dietary Fibre	P2/19
Schramm, G.	Fortification of Extrudates by Bran vs. Generation of Acrylamide	P2/20
Thomann, R.	Drink Powders for Milk Shakes With Definite Nutrient Profiles for Clinical Intervention Studies and Consumer Acceptance Tests Offer of IGTV Germany	P2/21
Arendt, E. K.	Identification of Lactic Acid Bacteria Isolated From Oat Sourdoughs and Investigation of Their Potential for the Improvement of Oat Bread Quality	P2/22
Arendt, E. K.	Rheological Properties and Bread Making Performance of Commercial Wholegrain Oat Flours	P2/23
Arendt, E. K.	Physicochemical Properties of Oat Varieties and Their Potential for Bread Making	P2/24
Moroni, V.	Competitiveness of Commercial Starters in Buckwheat and Teff Sourdoughs	P2/25
Vallons, K. J. R.	Effects of High Pressure and Temperature on Buckwheat Starch Characteristics	P2/26
Vallons, K. J. R.	Promoting Structure Formation by High Pressure in Gluten-Free Flours	P2/27
Renzetti, S.	Transglutaminase Treatment of Brown Rice Flour: Insights on Protein Polymerisation and Structural Modifications	P2/28
Cocci, E.	Quality and Antioxidant Property of Bread Containing Different Amount of Buckwheat Flour	P2/29
Schleining, G.	Effects of Millet, Amaranth, Quinoa, Buckwheat And Maize on Physical Properties of Gluten-Free Bread	P2/30
Noort, M.	Wheat Cultivar Quality for Whole Meal Bread	P2/31
Noort, M.	Increase the Healthy Components and Maintain Bread Quality	P2/32
Sivam, S.	Interactions Among Wheat Proteins, Fibre Polysaccharides and Phenolic Antioxidants in Bread Revealed by Fourier Transform Infrared (FTIR) Spectroscopy, Raman Spectroscopy, Size-Exclusive High-Performance Liquid Chromatography (SE-HPLC) And Rheology	P2/33
Ciesarova, Z.	Impact of Bread Improvers on Acrylamide Content and Sensory Properties of Breads	P2/34
Hansen, J. H.	From Grain to Feed – Fractionation of Protein Rich Crops for the Use in Extruded Fish Feed Pellets	P2/35
3. Nutrition and metabolism		
Kardinaal, A.	Challenging Homeostasis to Detect Subtle Metabolic Changes With Potential Long-Term Health Benefits	P3/01
Havenaar, R.	The Use of a Dynamic In Vitro Digestion System (TIM) to Study Beneficial Effects of Whole Grain Products	P3/02
Kappel Theil, P.	Improved Insulin Economy in Pigs Fed Whole Grain Cereal Fractions is Associated With Colonic Production of Butyrate	P3/03
Andersson, U.	Metabolic Effects of Different Fractions of the Wheat Grain in the C57BL/6J Mouse	P3/04
Nyman, M.	Impact of <i>Lactobacillus Rhamnosus</i> for the Colonic Formation of Short-Chain Fatty Acids in Rats Fed Three Different Barley Fractions	P3/05
Nilsson, A.	Effects of Pre-Biotic Evening Test Meals on Colonic Fermentation, Glucose Tolerance, Satiety, and Inflammatory Markers the Subsequent Morning	P3/06
Nilsson, A.	Why Are Low Glycaemic Index Foods and Foods Rich in Whole-Grain Associated With Reduced Risk of Type-2 Diabetes and Cardiovascular Disease?	P3/07
Östman, E.	Effect of the Glycaemic and Insulinaemic Indices of Whey and Cereal Breakfast Meals on Glucose Tolerance at a Subsequent Lunch Meal in Healthy Subjects	P3/08
Rosén, L. A. H.	Metabolic and Satiating Properties of Rye and Wheat Products	P3/09
Lappi, J.	Effects of Healthgrain Diet on Metabolic Risk Factors in Subjects at Risk for Type 2 Diabetes	P3/10

Lappi, J.	Sourdough Fermentation of Wholemeal Wheat Bread Decreases Glycemic Responses in Subjects With Impaired Glucose Metabolism	P3/11
Priebe, M.G.	Factors Related to Colonic Fermentation of Non-Digestible Carbohydrates of a Previous Evening Meal Increase Tissue Glucose Uptake and Moderate Glucose-Associated Inflammation	P3/12
Hallström, E.	Resistant Starch Formation in Pumpernickel Bread From High-Amylose Wheat and its Effect on Glucose and Insulin Responses in Healthy Subjects	P3/13
Giacco, R.	Effects of the Regular Consumption of Wholemeal Wheat Foods on Cardiovascular Risk Factors in Healthy People	P3/14
Giacco, R.	Effects of Whole Grain Intake on Insulin, Glucose and Lipid Metabolism in Subjects With Metabolic Syndrome (METS) Living in Naples (preliminary results).	P3/15
Kristensen, M.	Effect of a Hypo-Caloric Diet Rich in Whole Grain Foods on Weight Loss, Body Composition and Cardiovascular Risk in Postmenopausal Women: A 12 Weeks Randomised Clinical Trial	P3/16
Jensen, M.G.	Wholemeal Wheat Bread and Pasta - Effect on Postprandial Glycemia, Appetite, and Subsequent <i>Ad Libitum</i> Energy Intake in Young Healthy Adults	P3/17
Ross, A.B.	A Wholegrain Cereal-Rich Diet Increases Plasma Betaine, and Decreases Total And LDL-Cholesterol Compared to a Refined Grain Diet	P3/18
Keaveney, E. M.	Uptake of Methyl Donors (Folate, Betaine And Choline) From Wheat Bran and Aleurone in Humans	P3/19
Sahlstrøm, S.	Effects of Commercial Processing of Barley on Levels of Phenolic Acids and Antioxidant Activity: Role of Dietary Phenolic Acids on Activation and Inhibition of Nuclear Factor Kappa B	P3/20
Hansen, L.	Intake of Fiber From Cereals Protects Against Colorectal Cancer in the Helga Cohort	P3/21
Meija, L.	Cereal Fiber Intake in Men at The Risk Age of Prostate Cancer	P3/22
Johansson, E.	Prebiotic Effects of AXOS And RS On Over-Night Glucose Tolerance	P3/23
Govindarajan, B.	Benefits of Cereal Brans	P3/24
Arndt, E.	Comparison of Whole Grain Sustagrain Barley, Whole Grain Wheat, and Refined Rice-Based Breakfast and Snack Foods on Short-Term Satiety and Energy Intake	P3/25
Kyrø, C.	Intake and Determinants of Intake of Whole Grains in Norway, Sweden and Denmark	P4/01
4. Consumer aspects		
Selinheimo, E.	Healthgrain Wheat Breads Evaluated in Sensobus by Belgian and Finnish Consumers	P4/02
Kunkulberga, D.	Health Grain Products - Consumers Expectations, Latvia	P4/03
